*Am. Novelty Co. No. 184-100*  
**Photo Frame in Metal.**

**M**ANY novelties in metal have been brought out this season, and the various designs made up with different kinds of metals, present pleasing and artistic contrasts. Gold, silver, copper, brass, platinum and bronze in varied colors are brought into use, creating effects which are novel and taking. On this page will be found an illustration of a new and striking design for a photograph frame, which needs little comment. It is prettily executed in silver and gilt, the swinging doors opening and disclosing a place for a cabinet photograph.

PHOTOGRAPH FRAME.
